FUNCTIONS

Calling

1. Under the standby mode, when "Call" Button of the outdoor unit is pushed, both the indoor units will be ringing for 12s; the screens will light up; and visitors' images can be seen on the screens.
2. Under the calling mode, when there is no answer, the call will be automatically hung up after 60s.
3. Under the calling mode, when "☎" Button of either of the indoor units is touched, the ring will stop and the intercom mode will start in which a two-way intercom of 100s can be made between the indoor and outdoor units. To stop the intercom in advance, touch "☎" Button of the indoor unit; the intercom and the screen will be off simultaneously. Otherwise the intercom will be automatically hung up after 100s.

Monitoring

1. Under the standby mode, touch "☎" Button of either of the indoor units, the screen will light up, through which the images of the outdoor unit can be seen. At this time, only one-way conversation is available (from the outdoor unit to the indoor unit).
2. To stop the monitoring mode, touch "☎" Button of the indoor unit. The intercom and the screen will be off simultaneously. Otherwise the intercom will be automatically hung up after 100s.

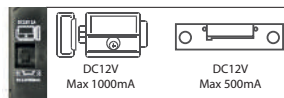

Intercom

Under the standby mode, push on "INTERCOM" ☎ button of the main monitor or secondary monitor. The two units will be ringing during 6 sec then switch off automatically. Push on the "ANSWER" ☎ button of the monitor which receives the call. Push on the "HANG UP" ☎ button of one of the two monitors to stop the call. Note: intercom will be automatically hung up after 100s. (Timekeeping starts from answering)

Unlocking

1. Electric strike

- This unit is compatible with 2 technologies of lock.
- Select the right mode at the back of the outdoor unit according to you lock:
- Under the intercom mode, push "☎" Button of the indoor unit to open the door, with the unlocking time being 5s.

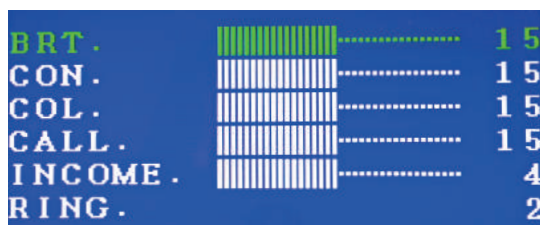

2. Gate:

- Under the intercom mode, push "☎" Button of the indoor unit to open the gate, with the unlocking time being 1s.

Settings

1. Under the standby mode, push "⚙️" Button to set the brightness, contrast, color, intercom volume, income volume and ringtones (push "⚙️" Button to select the adjustment item and then push "☎" ☎ " Buttons to adjust the value of the selected item.)

Other

1. Backlight :

- When "Call" Button of the outdoor unit is pushed or the indoor unit is monitoring, the backlight of "Call" Button of the outdoor unit will automatically light up.
- Under the standby mode, the backlight of "Call" Button of the outdoor unit will automatically light up at dark and turn off in the day time.

2. Additional camera :

- An additional camera can be set up with this videodoorphone. For its electric installation, please refer to the wiring diagram
- Under the standby mode, touch "  " button of the indoor unit, the screen will light up, through which RT sights and sounds recorded by cameras can be seen. Once this mode starts, it will conduct RT working in an unlimited time.
- To stop the mode, touch "  " button of the indoor unit, and the talk as well as the screen will be off simultaneously. (Note: the additional camera does not switch off automatically).

3. Alarming :

- Under the standby mode, push "  " Button of the indoor unit, it will make an alarm of 6s and automatically shut down after 6s.

Help

1. The voice is not audible during the call.
A: The connection between the monitor and the camera has been cut off. / B: The volume is too low.
2. The image is blurry.
A: The brightness is so low that the image is not visible. / B: Set the brightness.
3. Opening is not possible.
The cable is not connected or there is a short circuit.

Recyclage

Ce symbole soutient le traitement sélectif des déchets d'équipements électriques et électroniques (WEEE). Cela signifie que ce produit doit être traité conformément à la directive Européenne 2002/96/EC dans le but d'être recyclé ou démonté pour minimiser son impact sur l'environnement. Pour davantage d'informations, veuillez contacter les autorités locales ou régionales.

Les produits électroniques non inclus dans le processus de traitement sélectif sont potentiellement dangereux pour l'environnement et la santé humaine dû à la présence de substances dangereuses.

Élimination de piles jetables et rechargeables usagées

L'utilisateur est légalement tenu (par la réglementation sur les piles) de rendre les piles jetables et rechargeables usagées. Jeter des piles usagées dans les déchets ménagers est interdit ! Les piles jetables et rechargeables contenant des substances dangereuses sont identifiées par une poubelle sur roues barrée. Ce symbole indique que le produit en question ne peut être jeté aux ordures ménagères. Les symboles chimiques pour les substances dangereuses respectives sont Cd = cadmium, Hg = mercure, Pb = plomb.

Vous pouvez déposer gratuitement vos piles jetables et rechargeables usagées dans l'un des points de collecte de votre commune, dans nos magasins ou dans des points de vente de piles jetables et rechargeables. Ainsi, vous remplirez vos obligations légales et contribuerez à protéger l'environnement !
